Save time and effort

with Futudent non-interruptive cameras

Challenges with interruptive cameras:

- ✗ Stop the procedure
- ✗ De-glove
- ✗ Locate camera and set up
- ✗ Operate inside the mouth
- ✗ Fogging
- ✗ Sterilizing / protecting
- ✗ File transferring

These cameras can cost you up to 3 to 5 minutes with every patient. Free your hands and save your time with Futudent's solution!

Benefits of non-interruptive cameras:

- ✓ Faster and easier to use
- ✓ Instantly available
- ✓ Hands-free
- ✓ Take photos PLUS video
- ✓ No stopping procedure
- ✓ Chair-light or loupe-mounted
- ✓ Record / save / share video
- ✓ Data stored directly in operatory computer

All advantages in one camera. Futudent non-interruptive cameras cover most of the demands of dental documentation: full HD videos and high quality stills (up to 13 MB). Cloud services make it fast and secure to share videos and images to colleagues and patients. Do your all imaging hands-free with a chair-light or loupe-mounted camera.

How can video help you?

Futudent non-interruptive cameras are designed for taking great still photos and videos. There are dozens of applications for video in today's dental office. Futudent makes it easy to take video into daily use with every patient. This offers tremendous benefits from increased

efficiency in documentation, to happier and more accepting patients. Video is also a powerful communication tool for collaboration within the treatment team. Video offers an exciting and effective new way for doctors to document and communicate their work with colleagues and patients alike.

Patient Work

- ✓ Video treatment plans
- ✓ Hygiene instructions
- ✓ Home care guides
- ✓ Post-operative care
- ✓ Live examination
- ✓ Patient education
- ✓ Record documentation

Professional Work

- ✓ Case documentation
- ✓ Remote consultation
- ✓ Team collaboration
- ✓ Teledentistry
- ✓ Quality assurance
- ✓ Skills training
- ✓ Insurance documentation

Always easy and effortless to use!

Multi-mount cameras

for any loupe and light

Light mount benefits

- Always available
- Instant activation with a pedal
- Perfectly stable
- Available for everyone to use
- Can be installed in every operatory

Loupe mount benefits

- Matches the exact view of the doctor's own loupes
- Completely unobstructed footage
- Hands free operation

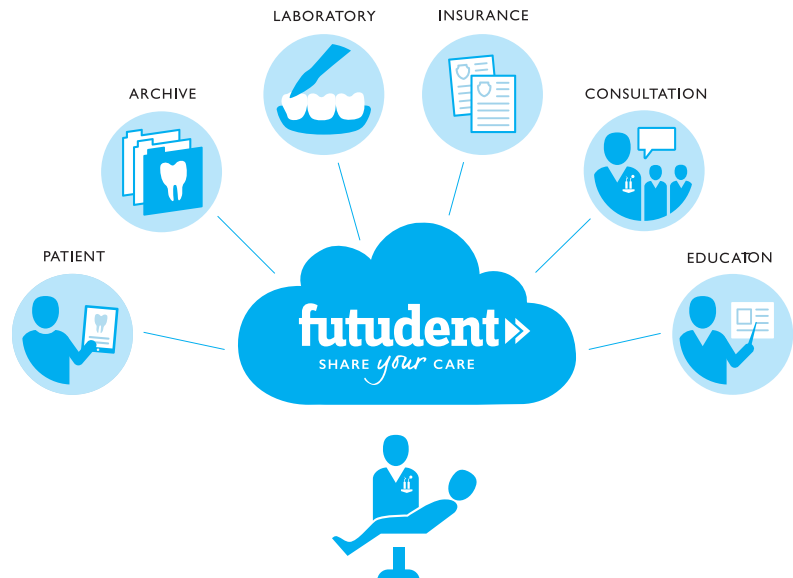

Cloud Platform

The Futudent cloud platform allows dentists to easily store and share their video content online securely.

The MyDentalbook cloud sharing services is included with every Futudent product and is designed to let you send personalized video instruction home to your patients where they need it most.

The platform also enables easy peer-to-peer case sharing making it simpler than ever before to collaborate with fellow dental professionals.
